EDUCATION

B.Tech • Artificial Intelligence & Machine Learning

Graphic Era Hill University
Year 1 · CGPA: 7.5 · Exp. 2029

LANGUAGES

- Python
- Java
- C

AI & MACHINE LEARNING

- ML Fundamentals
- Data Preprocessing
- NumPy · Pandas
- Matplotlib · Scikit-Learn

WEB DEVELOPMENT

- HTML / CSS / JavaScript
- Responsive Design
- React (learning)

CS FUNDAMENTALS

- Data Structures & Algorithms
- OOP · Problem Solving
- Database Basics

TOOLS & PLATFORMS

- Git · GitHub
- VS Code · Jupyter
- Vercel · Supabase

CREATIVE SKILLS

- Photography & Videography
- Video Editing · Color Grading
- Visual Design & Branding
- Content Strategy

SOFT SKILLS

- Communication
- Teamwork · Leadership
- Critical Thinking
- Presentation

PROFILE

I'm a first-year B.Tech student in Artificial Intelligence at Graphic Era Hill University with a strong drive to build things that are both technically sharp and genuinely useful. I enjoy writing clean code, training models, and crafting experiences that feel intuitive from the first interaction. I learn fast, think creatively about technical problems, and take real pride in the work I put my name on.

PROJECTS

Python Roadmap

Interactive Learning Platform

HTML · CSS · JavaScript

Designed and built an interactive learning roadmap that takes complete beginners through Python, from core syntax to real, hands-on projects. Structured around progressive milestones and curated resources, with a clean responsive interface built to be genuinely useful rather than just visually appealing.

CampusEats

Campus Food Ordering Platform · In Progress

HTML · CSS · JavaScript

Building a food ordering platform for college campuses that mainstream delivery services don't serve. Students can browse nearby vendors, explore menus, and filter by preference through a mobile-first interface built around how students actually eat. Solving a real gap in the local student ecosystem at GEHU Bhimtal.

WHAT I BRING

- I pick up new tools and languages fast and prefer learning by building real things.
- I care as much about the end-user experience as I do about the code that drives it.
- I bridge technical thinking with creative execution naturally and without friction.
- I work well independently, and I collaborate just as comfortably within a team.
- I bring both a developer's precision and a designer's eye to everything I ship.

Open to internships, collaborations, and opportunities where I can learn, build, and make a real contribution from day one.
